

CONTAINERIZED SINK UNIT

ISO 9001:2008 CERTIFIED

Containerized for durability, each unit provides 16 individual sink basins, hot and cold water, and interior lighting. Designed from the ground up with field conditions in mind, these units are plug-and-play and can easily adapt to existing municipal water and sewer systems. In areas without infrastructure, tanks can be provided for both fresh water and gray water storage.

Units can be operated independently or combined with additional sink units to support larger events. They can be positioned on the ground or left on the chassis for added flexibility. Containerized sink units are ideal for military exercises, special events or disaster relief operations.

SPECIFICATIONS:

Sinks:	16
Water Heater:	100 Gal. - LP Gas or Electric
Water Inlet:	Garden Hose
Weight:	8,000 lbs
Footprint:	8' x 20'
Power:	50A 220V Plug
HVAC:	1-Ton Heat/AC unit
